

C.U.R.E. KIT

INTRODUCTION

Tell me about C.U.R.E. Kits:

A C.U.R.E. Kit is a specially prepared box, containing an assortment of medical supplies, medications, and instruments, designed to be hand-carried by a short-term medical team for international use. The purpose is to provide the most common medical and surgical items needed by a short term medical team. C.U.R.E. Kits are also suitable as gifts to doctors and clinics in third-world countries. Each C.U.R.E. Kit contains thousands of dollars of medical supplies. They are packed each month from the current donated supplies that Project C.U.R.E. has in inventory. All medications have current expiration dates. All disposable products are unopened, though some may be post-dated. Each kit is pre-made. Custom orders are not available.

Qualifications:

We require proof that the final recipient of a C.U.R.E. Kit be a qualified health professional and that the supplies will not be used in the United States.

Boxes, boxes, boxes:

A C.U.R.E. Kit is designed to meet international airline travel regulations. This sturdy box measures 22" x 22" by 22" and weighs 45 lbs.

Partner with us in "Delivering Health and Hope to the World":

All of the items that Project C.U.R.E. supplies are free of charge. We do ask that you partner with us by providing a contribution for handling of \$150 per kit to cover the procurement, shipping, storage, and administration system.

Yes, send me a C.U.R.E. Kit; send me 10 C.U.R.E. Kits!

Prepayment of the handling charge, in the form of a check or cash, is required *prior* to the shipping of your order. C.U.R.E. Kits may not be returned for a refund.

Shipping Information:

Ground shipment within the continental U.S. is included in the handling charge. If you desire faster delivery, you are responsible for the added costs. Please allow extra time for multiple orders. Project C.U.R.E. cannot guarantee when the shipping service will deliver your CURE kits. If time is of the essence, we recommend that you use a guaranteed delivery service.

Read this please:

Contents of the C.U.R.E. Kits change from month to month, depending on the current inventory. As a result, the list you review may not actually include the same items that are in the actual kit. However, we will include a detailed inventory and letter of donation for your C.U.R.E. Kit. These documents are essential for customs purposes - please don't lose them!

MEDICATIONS AS AVAILABLE

We will provide Meds on a request basis only and as available. Due to many customs restrictions, Meds can be difficult to import into certain countries. Prior to requesting you should be certain that you will be allowed to enter the country with the Meds. Most Meds provided will have 3 months of remaining dating. This may be a factor to also consider as some countries today require a minimum of one year of dating to be acceptable.

Meds are provided in general categories and we cannot guarantee that the specific Med you need will be included in the consignment. Meds are sorted by date and packaged by date and category.

Over the Counter: Analgesics, antacids, antibiotic ointment, antihistamines, antiemetics, cold/cough, diarrhea, eye/ear, laxatives

Other: Cardiac, GI, Respiratory, Neurological, Endocrinological

NOTE: The above list is only a representation of a typical C.U.R.E. Kit. Actual contents vary according to current donations available to Project C.U.R.E.
